

ARJUN K

Data Scientist · Machine Learning Engineer · Data Analyst

Kozhikode, Kerala, India — +91 95266 58695 — arjunkalliyadath2001@gmail.com

LinkedIn — GitHub — Portfolio

PROFESSIONAL SUMMARY

Data professional with hands-on, end-to-end experience across the ML lifecycle — data collection, model development, and dashboard deployment — sharpened through a 3-month AI/ML internship and a self-driven portfolio of 9+ deployed applications. Proficient in Python, scikit-learn, PyTorch/TensorFlow, and NLP with HuggingFace Transformers, with practical exposure to computer vision, anomaly detection, time-series forecasting, and OCR/document AI. IEEE-published researcher and Best Paper Award winner. Certified Data Science & Analytics Specialist (375 hrs, ICT Academy of Kerala) and IBM Data Science Graduate, looking to bring applied ML and analytics skills to a data-driven team.

TECHNICAL SKILLS

- **Languages:** Python, SQL, Java, JavaScript
- **Machine Learning & AI:** scikit-learn, TensorFlow/Keras, PyTorch, HuggingFace Transformers, OpenCV, MediaPipe, CNNs, NLP & Sentiment Analysis, LayoutLMv3
- **Analytics Techniques:** Anomaly Detection (Isolation Forest), Regression & Time-Series Forecasting, Predictive Modeling, Data Cleaning & Feature Engineering
- **Data, BI & Visualization:** Pandas, NumPy, Tableau, Power BI, Streamlit, Plotly
- **Engineering & Deployment:** FastAPI, Flask, Django, REST APIs, PostgreSQL, SQLite, Playwright, Git, Linux, Render

PROFESSIONAL EXPERIENCE

AI/ML Intern

Jun 2026 – Sep 2026

Ladder7 Nextstep Solutions — Kerala, India (Hybrid)

- Independently scoped, built, and deployed 4 end-to-end sentiment-analysis applications and a multi-platform brand-intelligence tool during the internship, each shipped as a working web app rather than a notebook.
- Automated data collection with Playwright across 6+ web sources (YouTube, X/Twitter, Google Reviews, Instagram, Reddit), handling dynamic content and pagination, then cleaned and deduplicated results with Pandas before modeling.
- Applied a HuggingFace RoBERTa sentiment model (CardiffNLP, Twitter-tuned) consistently across every project, adapting the surrounding scraper and dashboard to each platform's data shape.
- Owned each build end-to-end — scraping, modeling, REST API (FastAPI/Flask), and an interactive dashboard — reinforcing a full-stack approach to applied ML.

Graduate Apprentice – System Administrator (AI & Data Systems)

Jun 2024 – Jun 2025

Keltron — Kerala State Electronics Development Corporation Ltd. — Kozhikode, Kerala

- Monitored and maintained 100+ AI-enabled surveillance cameras for the Safe Kerala AI Camera Project (Motor Vehicle Department), sustaining 99.5% uptime through proactive health checks and anomaly detection.
- Built automated reporting workflows that compiled camera and system data for MVD certification and billing, cutting down manual reporting effort.
- Administered servers, storage, and network infrastructure for a 24x7 government enforcement control room, coordinating with vendors and the State Central Control Room to resolve issues quickly.

WordPress Website Developer Intern

Jun 2022 (15 Days)

Stalza Technologies — Kozhikode, Kerala

- Built and deployed a live production WordPress website with custom plugins and performance optimizations, delivered on schedule with positive client feedback.

KEY PROJECTS

GSTVision AI — Intelligent Document Processing Pipeline — Django · FastAPI · React · PostgreSQL

- Built a 3-tier document-AI system that extracts structured data (GSTIN, invoice values, tax splits) from scanned GST 2A statements and E-Way Bills using a triple-OCR pipeline (PaddleOCR + Tesseract + EasyOCR) and a fine-tuned LayoutLMv3 model.
- Added shadow correction and auto-straightening for poor-quality scans and phone photos, plus an auto-retraining loop that improves extraction accuracy from user corrections; outputs clean, ready-to-use Excel reports.

TrustLens — Trust & Safety Analytics Platform — Python · Streamlit · scikit-learn

- Built a unit-normalized analytics dashboard that turns platform trust & safety transparency reports (Meta, X, WhatsApp) into anomaly detection (Isolation Forest), per-organization forecasting with 95% confidence bands, and category-level breakdowns.

- Designed the data-cleaning layer to keep absolute counts and percentage/rate metrics from ever being wrongly summed, plus an offline, rule-based Q&A assistant that answers directly from the filtered dataset.

Manobhava-AI — Multi-Platform Brand Sentiment Intelligence — Python · FastAPI · Playwright · HuggingFace

- Built a tool that takes a company website, auto-discovers its products, and aggregates customer reviews across 5 platforms (Google, Twitter, Instagram, YouTube, Reddit) in parallel.
- Ran RoBERTa-based sentiment and aspect-level analysis on the combined review set, then generated a downloadable PDF report summarizing brand- and product-level sentiment.

Sentiment Analysis Suite — PulseScope · TweetPulse · StarSense · MoodRing — Python · FastAPI/Flask · HuggingFace · Playwright

- Shipped 4 independent sentiment-analysis apps covering YouTube comments, X/Twitter replies, Google Business reviews, and free-form text, each pairing a scraper with a Twitter-tuned RoBERTa model.
- Designed a consistent UX pattern across all four — sentiment split, curated top/bottom comments, word clouds or gauges, and CSV export — while adapting the scraper to each platform’s quirks.

Sign Language to Text Conversion (CNN) — TensorFlow · OpenCV · MediaPipe

- Built a real-time ASL-to-text/speech system using a custom CNN trained on 31,000+ hand-gesture images with MediaPipe hand tracking; published at IEEE ICCCI 2023 and awarded Best Paper at KARE Project Expo 2023.

Car Price Prediction — Flask · scikit-learn

- Built and deployed a Random Forest regression model ($R^2 = 0.93$, MAE 0.45L) that estimates used-car resale prices from 7 vehicle features, served through a Flask REST API.

Additional builds: a Netflix-inspired full-stack web app (Django/PostgreSQL), a Java desktop password manager (presented at ICCES 2022), and a themed calculator web app — full portfolio at github.com/Arjunkalliyadath.

CERTIFICATIONS

- Certified Specialist in Data Science & Analytics (375 hrs) — ICT Academy of Kerala, 2026
- IBM Data Science Graduate — IBM, 2023
- Python for Data Science (Elite, 67%) — NPTEL, IIT Madras, 2025
- Tableau 2024.1: Essential Training — LinkedIn Learning, 2025
- Complete Guide to Apache Kafka for Beginners — LinkedIn Learning, 2025

ACHIEVEMENTS

- IEEE ICCCI 2023 — Published “Analyses of Machine Learning Techniques for Sign Language to Text Conversion for Speech Impaired”
- Best Paper Award — KARE Project Expo, April 2023
- Presented “Password Management System for Students” at the ICCES 2022 International Conference
- Completed a 125-hour Virtual Internship, Research & Solutions Unit — ICT Academy of Kerala, 2026

EDUCATION

B.Tech in Computer Science & Engineering

2019 – 2023

Kalasalingam Academy of Research and Education — Tamil Nadu · CGPA: 7.8 / 10 (First Class)

Data Science specialization curriculum developed in partnership with IBM.
