

ARJUN K

Software Engineer · Full-Stack Developer · IT Systems

Kozhikode, Kerala, India — +91 95266 58695 — arjunkalliyadath2001@gmail.com

LinkedIn — GitHub — Portfolio

PROFESSIONAL SUMMARY

Computer Science engineer with 1+ year of professional experience spanning full-stack web development, backend API design, and IT systems administration. Shipped multiple full-stack applications (Django, FastAPI, Flask, React) with real databases, authentication, and deployment pipelines, alongside a year administering mission-critical government IT infrastructure at 99.5% uptime. Comfortable moving across the stack — Linux server administration, REST API design, and front-end UI — and looking to bring that range to a software engineering or IT team.

TECHNICAL SKILLS

- **Languages & Frameworks:** Python (Django, Flask, FastAPI), Java, JavaScript, React, HTML/CSS, Bootstrap
- **Backend & Data:** REST APIs, PostgreSQL, SQLite, ORM Design, Authentication & Sessions
- **Systems & IT Operations:** Linux Server Administration, Networking, Storage Management, Technical Support, Vendor Coordination
- **Tools & DevOps:** Git, Docker (basic), Gunicorn, Render, Postman, VS Code
- **Additional:** Web Scraping & Automation (Playwright), Applied ML Integration (scikit-learn), Tableau / Power BI

PROFESSIONAL EXPERIENCE

AI/ML Intern

Jun 2026 – Sep 2026

Ladder7 Nextstep Solutions — Kerala, India (Hybrid)

- Designed and shipped 4 full-stack web applications end-to-end — backend REST APIs (FastAPI/Flask), automated data pipelines, and interactive front-end dashboards — from initial architecture through deployment.
- Built a multi-service tool (Manobhava-AI) that combines web scraping, a FastAPI backend, and a dashboard front end to analyze customer reviews aggregated from 5 different platforms.
- Automated data collection and browser-based workflows using Playwright across 6+ sites, handling dynamic content and pagination.
- Worked across the full stack on every project — backend logic, REST endpoints, front-end templates, and deployment — while integrating third-party APIs and open-source ML models.

Graduate Apprentice – System Administrator

Jun 2024 – Jun 2025

Keltron — Kerala State Electronics Development Corporation Ltd. — Kozhikode, Kerala

- Administered end-to-end IT infrastructure for the Safe Kerala AI Camera Project (Motor Vehicle Department), overseeing 100+ networked AI surveillance cameras at 99.5% uptime.
- Performed server and storage maintenance, network administration, and real-time health monitoring across a 24x7 government enforcement control room.
- Built automated reporting workflows for MVD certification and billing, and coordinated with vendors and the State Central Control Room on equipment maintenance and issue resolution.
- Delivered multi-channel technical support (on-site, phone, email) and maintained IT/non-IT equipment protocols.

WordPress Website Developer Intern

Jun 2022 (15 Days)

Stalza Technologies — Kozhikode, Kerala

- Built and deployed a live production WordPress website using custom PHP plugins and performance optimizations, delivered on schedule with positive client feedback.

KEY PROJECTS

GSTVision AI — Full-Stack Document Processing System — Django · FastAPI · React · PostgreSQL

- Architected a 3-tier application: a Django + PostgreSQL backend, an independent FastAPI microservice for the AI/OCR engine, and a React (Vite) front end communicating over REST.
- Implemented a triple-OCR pipeline (PaddleOCR, Tesseract, EasyOCR) with a fine-tuned LayoutLMv3 model to extract structured data from scanned tax documents, with an auto-retraining loop from user corrections.

Netflix Tudum — Streaming Platform Clone — Django · PostgreSQL · Bootstrap 5

- Built a Netflix-inspired browsing experience from scratch — a database-backed catalog, genre rows, live search, a personal watchlist, and full user authentication (register/login/logout).
- Configured production-ready static file serving (WhiteNoise) and deployment on Render with Gunicorn, plus a re-runnable database seeding command for the show catalog.

Password Management System — Java · Swing · Cryptography

- Built a desktop password manager in Java Swing with a custom hash table (linear probing) for local storage and SHA-1 + salt hashing so no password is ever stored in plain text.

- Presented the project at the ICCES 2022 International Conference, addressing digital security awareness among students.

Car Price Prediction — Flask · scikit-learn · REST API

- Built a Flask REST API serving a Random Forest regression model ($R^2 = 0.93$) that predicts used-car resale prices from 7 input features, deployed with Gunicorn on Render.

BrowseBrief — Web Scraping & Summarization Tool — Python · Playwright · LangChain · Groq

- Built a CLI tool that scrapes any webpage with Playwright and generates an AI summary via LangChain + Groq's LLM API, runnable as separate scrape/summarize steps or a single pipeline command.

Additional builds: a multi-platform sentiment-intelligence tool (Manobhava-AI) and four sentiment-analysis dashboards (FastAPI/Flask + HuggingFace) covering YouTube, X/Twitter, and Google Reviews, plus a real-time ASL-to-text CNN system (IEEE-published, Best Paper award) — full portfolio at github.com/Arjunkalliyadath.

CERTIFICATIONS

- Certified Specialist in Data Science & Analytics (375 hrs) — ICT Academy of Kerala, 2026
- IBM Data Science Graduate — IBM, 2023
- Python for Data Science (Elite, 67%) — NPTEL, IIT Madras, 2025
- Tableau 2024.1: Essential Training — LinkedIn Learning, 2025
- Complete Guide to Apache Kafka for Beginners — LinkedIn Learning, 2025

ACHIEVEMENTS

- IEEE ICCCI 2023 — Published “Analyses of Machine Learning Techniques for Sign Language to Text Conversion for Speech Impaired”
- Best Paper Award — KARE Project Expo, April 2023
- Presented “Password Management System for Students” at the ICCES 2022 International Conference
- Completed a 125-hour Virtual Internship, Research & Solutions Unit — ICT Academy of Kerala, 2026

EDUCATION

B.Tech in Computer Science & Engineering

2019 – 2023

Kalasalingam Academy of Research and Education — Tamil Nadu · CGPA: 7.8 / 10 (First Class)

Data Science specialization curriculum developed in partnership with IBM.
